- New features!
- Alert levels made more understandable
  - Easy to understand information sent by email
  - Emails sent in 11 languages
  - Essential information sent in real time

## Why should you sign up for the Disaster Email Notification?

This service brings together essential disaster information to protect Hiroshima Prefecture residents' lives from disaster and sends it out in real time.

### Provides life-saving information

You can obtain the information needed to protect yourself, such as evacuation advisory/order status, tsunami and weather cautions and alerts, and risk of mudslides or flooding.

### Sign up for alerts on multiple regions

You can register multiple municipalities, including where you live. You can see what kinds of dangers are occurring in registered areas.

### Identify when to evacuate based on the alert level

You can judge when to evacuate and what actions to take based on the alert level.

\* Although the service is free, the user is responsible for telecommunications charges such as those needed to receive emails.

You will be sent an email if evacuation is necessary in the area where you live.

What kind of  
information  
can you receive?

- When evacuation information [evacuation of seniors and other impaired individuals, evacuation order] has been issued

- When a river has reached a flood danger level

- When mudslide warning information has been issued
- When a tsunami warning has been issued

Note: Some information is sent through emergency alert emails too.

# Be sure to sign up to be prepared for a disaster!

Signup and settings are easy!

## STEP 1

Scan the QR code on the cover and send a blank email.

## STEP 2

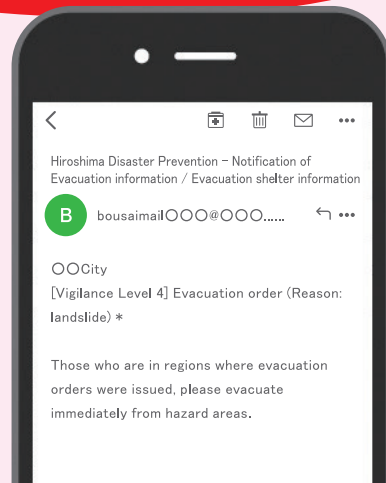

The sign-up address will be sent by email. Access it and proceed to the signup page.

## STEP 3

Configure receipt settings. "Necessary items only" is recommended for first-time signups.

## STEP 4

You can register easily by simply configuring the municipality and items of information you want to receive.

\* Although the service is free, the user is responsible for telecommunications charges such as those needed to receive emails.

\* The text of the actual email may differ from the illustration.

✉ Notices sent by the Hiroshima Prefecture Disaster Email Notification Service (required items only)

	Title	Content
Evacuation information	Ensuring emergency safety <b>Alert level 5</b>	Sent when the municipality has issued evacuation information (the 3 levels to the left)  * Information on the opening of evacuation sites can be checked on the Hiroshima Prefecture Disaster-prevention Website linked in the text of the evacuation information email.
	Evacuation order <b>Alert level 4</b>	
	Evacuation of seniors and other impaired individuals <b>Alert level 3</b>	
Weather caution - warning	Special warning <b>Equivalent to alert levels 4-5</b>	Sent when the danger of a serious disaster has increased markedly, to urge maximum caution
	Warning <b>Equivalent to alert levels 3-4</b>	Early warning sent to be alert for the risk of serious disasters
Record short-term heavy rainfall information	Record short-term heavy rainfall information	Sent when short-term heavy rainfall levels occurring only once every few years has been observed or predicted
Mudslide warning information	Mudslide warning information <b>Equivalent to alert level 4</b>	Sent when a heavy rainfall warning has been issued and the risk of mudslides has increased further
Mudslide danger information	Base value exceeded at present, base value to be exceeded in two hours <b>Equivalent to alert level 4</b>	Sent when a risk of mudslide has been identified due to heavy rainfall
Tsunami information	Tsunami warning	Sent when there is a risk of damage due to a tsunami with a maximum height of 0.2-1 m
Designated river flooding warning	Flooding information, flooding danger information <b>Equivalent to alert levels 4-5</b>	Early warning sent for water level, or current information on a designated river segment, as a reference for residents in considering evacuation in response to rising river levels, flooding, etc.
Flood warning danger information	Highly dangerous, extremely dangerous <b>Equivalent to alert level 4</b>	Additional flood warning information, sent when a risk of flooding has been identified in small/medium-sized rivers

You also can configure the service to receive information additional to that in the table above.

Alert level: Actions to take depending on the risk of damage, and related information to assist with such actions

Alert level information: Shows the level of evacuation information to which the disaster/weather information corresponds, as a reference for residents when deciding whether or not to evacuate.

## Hiroshima Prefecture's "Minna de Gensai" disaster-mitigation activity

Aiming to realize a disaster-resistant Hiroshima Prefecture, this activity began in 2015 through residents, volunteer disaster-prevention organizations, businesses, governments, and others cooperating to take appropriate actions to protect residents from disasters.
